Previous edition unusable

STANDARD FORM 30 (REV. 11/2016)
Prescribed by GSA FAR (48 CFR) 53.243

1) Question:

The RFQ mentions that the vendor must “Review the entire codebase (approximately 29,869 lines of code) with a focus on functionality and maintainability.” Is there a backlog of functionality desired and/or is stories found in the github repository and trello project effectively representative of the additional functionality desired

Answer:

Our primary focus is more general, about which portions of the codebase are written extensively and which portions would be more difficult to extend/refactor. The RFI responses indicated that some reviewers would prefer to work without extra context, while some would prefer to have that context. For a reviewer who prefers context, we do have a set of user stories, weighted by impact, that we can provide.

We were planning to provide those user stories at the time of award, if the reviewer wants them.

All other terms and conditions apply and the quotation due date remains unchanged, November 14, 2017 by 4:00 pm. Questions regarding this amendment should be addressed to the Contracting Officer, Michelle McNellis, michelle.mcnellis@gsa.gov.
